Architecture

Designed a database with 2 collections, Users and Posts.
The Posts collection has title and tags[] fields indexed for fast read speeds.

---Collection#1:

```
Users {
    _id: xxx,
    name: xxx,
    email: xxx,
    password_hash: xxx,
    profile_pic: xxx,
    [optional] superadmin: True/False,
    [optional] admin: True/False,
    [optional] editor: True/False,
    [optional] users_assigned: [xxx.ID, xxx.ID,...]
}
```

---Collection#2:

```
Posts {
    _id: xxx,
    title: xxx,
    content: xxx,
    image_links: [xxx, xxx...],
    author_name: xxx,
    author: xxx.ID,
    tags: [xxx, xxx, xxx...],
    comments: [
        { id: xxx.ID, commenter_name: xxx, commenter_id: xxx.ID,
source_id: comments.xxx.ID, text:xxx }
        .
        .
        .
    ]
}
```
